CAREER OBJECTIVE

Ambitious and results-driven individual seeking an entry level position to launch my career where I can my skills and grow professionally while contributing in the prosperity of the organisation.

WORK EXPERIENCE

■ **Intern at Technoglobe**
Data Analyst

- Analyze complex data to help companies make better decisions.
- Apply my skills to visualize data in from of attractive dashboards.

PROJECTS

- **Spotify Data Exploration**
  Tools Used: PostgreSQL
  This project involves analyzing a Spotify dataset with various attributes about tracks, albums, and artists using SQL. It covers an end-to-end process of normalizing a denormalized dataset, performing SQL queries of varying complexity (easy, medium, and advanced), and optimizing query performance. The primary goals of the project are to practice advanced SQL skills and generate valuable insights from the dataset.

- Analyzing and Dashboarding Netflix Data
  Tools Used: Power BI
  Analyzed Netflix data to find trends in genres, user engagement, and viewership.
  Built interactive Power BI dashboards to showcase insights about popular content.
  Used Python to process and analyze the data, making it easy to understand.
  Delivered clear reports and dashboards to help improve content strategies
